

## **CARRASQUILLO ASSOCIATES, LTD.**

MATERIALS, CONSTRUCTION, AND  
STRUCTURAL CONSULTANTS

CA is a leader in forensic engineering consulting in the areas of materials, construction, and structures. CA's reputation of excellence and its effectiveness in investigating, understanding, and solving engineering problems is the result of the broad in-house knowledge and concurrent expertise in multiple areas including materials, structural engineering, construction, specifications, codes, durability, repair, in-situ condition assessment, and testing.

### **Seeking Full-Time Engineers**

CA is currently looking to add a Project Engineer to its team in Austin, TX. The Project Engineer will work under the supervision and direction of the Project Manager team, assisting on forensic engineering investigations with a focus on litigation-based projects. The Project Engineer will assist with structural modeling, analysis, and design on forensic investigations and repair projects, however, the Project Engineer should be willing and able to regularly assist on nonstructural-type projects as directed by the Project Managers. Ideal candidates will have a wide breadth of knowledge related to construction and various infrastructure. Previous forensic engineering experience is a plus.
